## MIXTURES AND POPULAR VARIETIES.

The following list will be found very suitable for the SMALL PACKET and LITHOGRAPHIC PACKET TRADE.

The mixtures offered have been grown as mixtures but contain all desirable colors in each respective case.

Good culture is given and all objectionable colors are rogued out. We would draw special attention to the exceptionally low prices quoted, which combined with the good quality of the seed makes this offer worthy of keen consideration.

## Specialty — ASTER — Specialty

(ANNUAL)

The quality of our Asters is unsurpassed and will satisfy the most critical trade. The American climate is especially suitable for the production of the highest quality of Aster seed. We have at different times, visited the seed-growing countries of Europe, but have yet to see this most popular flower grown to such perfection. Much attention is given to the roguing, not alone of imperfect blooms and varying colors, but also of any slight departures from the true shades. A trial will be most convincing.
